

## Official Certifications

GMP Registered

### GMP Certification

**NSF GMP and NSF GMP for Sport™** registrations verify that SimpleXity Health's facilities and operations, as well as ingredient sourcing, comply with GMP requirements. Earning NSF GMP and NSF GMP for Sport™ registrations enables SimpleXity Health to emphasize the quality and safety of its operations. GMPs are regulations outlined by the U.S. Food and Drug Administration (FDA) and require dietary supplement facilities to following quality-assurance practices that minimize the risk of contamination. This includes all aspects of the manufacturing process, from raw material control to finished product release, as well as employee training, validation of testing equipment, product traceability, and facility maintenance.

### Organic Certification

Since 2001, Simplexity Health's facilities and Super Blue Green® Algae have been certified organic according to the U.S. Department of Agriculture's National Organic Program standards. Pro-Cert Organic Systems Ltd. of Canada performs a thorough annual audit at Simplexity Health's Klamath Falls facilities. During this time, Pro-Cert representatives review our records and processes, and inspect the facilities as well as the Upper Klamath Lake watershed. Simplexity Health currently offers seven organic-certified products. We will continue to increase the number of organic-certified products in the future.

### Halal Certification

*Halal* is an Arabic word meaning 'lawful or permitted.' The internationally respected Islamic Food and Nutrition Council of America (IFANCA) developed a documented procedure for producing halal products that assures methodical cleanliness and consistency throughout the production process. IFANCA inspected Simplexity Health's facilities and processes, including equipment, ingredients, cleaning procedures, and records. At this time, eight Simplexity products are halal-certified: Alpha Sun® capsules, Essentials™, Omega Sun® capsules, SBG Zymes® Plus, Super Q10, and StemPlex®. IFANCA's halal certification symbol, the Crescent M, will be displayed on these products' labels as soon as possible.
